

Budget Unit Brief

FY 2017

Instructional Support Program

Program Overview

The Instructional Support Program was created during the 1989 Legislative Session with enactment of House File 535 (School and Area Education Agency Financing Act) with implementation of the Program beginning in FY 1992. The Program allows districts to increase their general fund budgets by up to 10.0% of the total regular program district cost. Districts may implement the Program for a five-year duration with local board approval (subject to a reverse referendum) or 10 years with voter approval.

Funding

Funding for the Program is formula-based and includes:

- State aid based on an Instructional Support Program funding formula.
- Local taxes including property taxes or a combination of property taxes and an income surtax.

The formula provides that state aid be distributed equitably so that districts with relatively higher property tax valuations per pupil receive less state funding in relation to districts that have relatively lower property tax valuations per pupil. However, since FY 1993, the state aid appropriation for the Instructional Support Program has been capped and the state aid portion of the formula has not been fully funded. Because school districts are not allowed to levy for the unfunded state aid portion, this results in a disparity in the level of funding school districts receive, with property-rich districts receiving a higher level of funding compared to property-poor districts.

Instructional Support State Aid: Annual Appropriation Cap

Funding for the Program includes a General Fund standing appropriation of \$14.8 million. However, that amount has been reduced each year since FY 2004 and has been held at \$0 since FY 2012. **Chart 1** (on the following page) provides the funding amounts for the Instructional Support Program since FY 1992. The adjusted state aid amount reflects the amount of state aid appropriated for the Program.

Notes:

Data displayed is based on Department of Management Aid and Levy Worksheets and does not reflect any adjustments made during the fiscal year (such as across-the-board reductions).

Unadjusted state aid is the total amount of state aid required to fully fund the state aid portion of the Instructional Support Program formula.

Adjusted state aid is the amount of state aid funding appropriated for the Instructional Support Program.

In FY 2010, there were no state aid dollars appropriated from the State General Fund. However, American Reinvestment and Recovery Act (ARRA) Education Stabilization funding totaling \$13.1 million was used in lieu of State aid.

The FY 2011 adjusted state aid total was \$7.5 million with funding appropriated from the School Infrastructure Fund in lieu of General Fund dollars.

In FY 2012 through FY 2017, there was no state funding appropriated for the Program.
